Cultivated Blueberries

The Two-Purpose Shrub

U.S. Department of Agriculture
1914

Superlatively fine fruit, also ornamental shrub of rare beauty. In spring the dainty new leaves of blueberries with their pink-bronze tones are very lovely. Even more charming are the corinne-tipped buds and myriads of waxy white flower bells. The fruit at first is green flushed with pink on the sunny side, then ripens to a lovely blue. The fall coloring is a beautiful crimson. The fruit is delicious.

Sold in units of 3 plants: 1 1/2 to 2 ft., \$5.00 for 3; \$18.50 for 12. 6 at the 12 rate.

VARIETIES

Burlington. This is one of the newer varieties. Berries are excellent flavor very large size and quite uniform. An unusually good keeper. Bush is medium high and crops heavily, and later in the season than other late varieties.

Cabot. A very early variety. Plants seldom exceed 3 feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

Concord. The bush is of upright habit and of maturity exceeds 6 feet in height. The young growth is bright red in winter. The berries are large, frequently exceeding three-quarters of an inch in diameter. They usually ripen a few days earlier than the other varieties.

Jersey. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue and ripen about the same time as Rubel.

Rubel. A very early variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

RASPBERRIES

Strong plants, \$1.50 per doz.; \$11.00 per 100.

Chief. The best early red variety, vigorous, productive, of excellent flavor.

Columbia. A handsome purple hybrid between the red and black varieties. Large, firm, handsome berries of high quality. Strong plants.

Cumbehead. Large "black-cap" fruits of excellent size.

Latham. Vigorous, disease-resistant variety, bearing exceptionally large berries of good quality, bright red. Late.

NEW INTRODUCTION

Indian Summer Raspberries. \$2.00 per doz.; \$15.00 per 100. A recent introduction. Large red berries of the everbearing type.

Giant Fruits from Midget Trees

Just the trees for your Victory Garden. Extremely dwarf trees grow less than half as tall as standard size trees, and bear good crops of big, juicy, delicious and brightly colored fruit than larger trees do. No waiting years for fruit—dwarf fruit trees come into bearing very early, usually the second year after planting.

The dwarf apple trees we offer are grafted on the Juan de Metz rootstock which is the standard for the fruit industry in the Riland search Station in England. This rootstock is the real dwarf understock, making our trees very dwarf in growth and far superior in quality. Our pears are grafted on quince; peach, apricot and nectarine varieties on almond, and plum on St. Julien.

Only the home owner can grow these special varieties and let the fruit stay on the trees until they have reached their peak of ripeness and flavor.

VARIETIES

APPLE. Red McIntosh, Wealthy, Yellow Transparent, Red Astrachan, Jonathan, Richard Delicious.

PEAR. Seckel, Clapp's Favorite, Bartlett, Doyenne de Comice, Flemish Beauty.

PEACH. Carman, Champion, Crawford, El-
